Network World - Google Books Result IBM Tivoli Federated Identity Manager provides web and federated single.
Integrating IBM Security and SAP Solutions - Google Books Result
IBM Tivoli Federated Identity Manager - OnWire
Understanding SOA Security Design and Implementation - Google Books Result
Having worked with IBM Security Access Manager since it was called, and services teams put together solutions using our security products. Without question, when working with access manager and federated identity, it's also quite trivial to write an EAI application in whatever web development environment you like.
