The Present Indicative-French - Learn French Indicative. The subjunctive is one of the three moods in Spanish, the other two being the indicative and the subjunctive. Learn how to conjugate French verbs into the present indicative mood, which is used to express facts, actions, and emotions in the present tense. The present indicative tense is also used to express actions that are habitual or permanent. For example, "Je parle français" means "I speak French." This is contrasted with the subjunctive mood, which is used to express uncertainty, doubt, or emotions such as desire or necessity. In French, the present indicative is formed by dropping the final -ons or -onts from the verb stems, and adding the appropriate personal endings for each person. For example, the verb "aller" (to go) becomes "j'allois," "tu allais," etc. This module includes exercises and quizzes to help you practice conjugating French verbs in the present indicative mood.
