It is a curious fact of American history that the people who dominated the early, formative years of both capitalism and environmentalism grew up in America in the late 19th century. The influence of The Protestant Ethic and the Spirit of Capitalism remains in 1904. Weber's Protestant Ethic maintained that capitalism's nature had to many of whom migrated to North America in the seventeenth century. Protestantism, Capitalism, and Nature in America has 4 ratings and 1 review. Nick said: Stoll attempts to demonstrate that environmentalism and capitalism were intertwined, and that nature in America was shaped by the interplay between these two forces. In his book, Stoll argues that the spirit of capitalism, which emphasizes progress, efficiency, and individualism, has shaped American attitudes towards nature. He also contends that environmentalism, which seeks to protect and preserve nature, has been influenced by the same cultural values that underlie capitalism. Stoll's book is highly recommended for anyone interested in the history of American thought and the relationship between religion and economics.
